

Bille Janssen Lagarde

Full Stack Developer

Valenzuela City, Philippines · 0917-314-9848 · bille.lagarde.personal@gmail.com · github.com/sensennysen

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of hands-on experience building production healthcare web applications at scale. Specialised in the MERN stack with TypeScript, I have delivered REST and GraphQL APIs, secure authentication flows, role-based access control, audit logging, and HIPAA-aware features used by 1,000+ medical providers. Comfortable across the full delivery cycle — from greenfield development and backend optimisation through to CI/CD, code review, and sprint planning — with an additional 7+ years of background in game development, technology education, and program coordination.

TECHNICAL SKILLS

Frontend	React, Vite, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST API design, GraphQL
Databases	MongoDB, PostgreSQL, MySQL, Supabase
Cloud & DevOps	Google Cloud Platform, Vercel, Docker (basics), CI/CD, Linux server management
Tools	Git, GitLab, Jira, Confluence, VS Code
Security	Secure authentication, RBAC, audit logs, HIPAA-aware development, PHI handling
Additional	Unity3D, Agile/Scrum, UI/UX collaboration, code review

PROFESSIONAL EXPERIENCE

Full Stack Application Developer · Theoria Medical PLLC

Makati City, Philippines (Remote) | May 2023 – May 2026

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js for a medical charting system serving 1,000+ providers across the United States.
- Built and integrated 10+ APIs supporting insurance processing, charting workflows, user roles, authentication, and patient data operations.
- Engineered an automated insurance processing pipeline using pVerify and facesheet data to finalise patient insurance records for payment workflows, reducing manual intervention significantly.
- Developed clinical charting features including screening forms for depression, tobacco use, and SDOH, and generated reports for missing patient insurance data.
- Implemented HIPAA-aware development practices encompassing role-based access, audit logs, PHI handling, and secure authentication (including PointClickCare integration).
- Reduced database query volume by 50% for patient and partner portal workflows through targeted backend optimisation.
- Resolved 50+ production bugs and maintained application stability, reliability, and performance across critical healthcare workflows.
- Delivered 2–3 tickets per sprint from development through production release within two-week Agile cycles.
- Managed GitLab repositories through merge requests, code reviews, and CI/CD deployment support.
- Collaborated with cross-functional teams via Jira and Confluence to align on sprint goals and improve documentation quality.

PROJECTS

Maimai Queue Check

React · Vite · Supabase · Vercel

mpgcheckph.vercel.app | github.com/sensennysen/maimai-queue-check

- Built and deployed a social-media-style queue-checking application for a local arcade game community with 100+ active users.
- Implemented Google authentication, posts, comments, notifications, admin tooling, audit logs, and real-time queue visibility.
- Maintains an up-to-date song library synced with the current maimai DX version.

Ledger — Personal Finance App

React · Vite · Tailwind CSS · Supabase · Vercel

[ledger-personal.vercel.app](#) | [github.com/sensennysen/personal_wallet_app](#)

- Built a personal finance application with Google authentication, expense tracking, visual charts, category management, and persistent storage.
- Extended with credit card management, budget-setting, finance forecasting, and reminder features.

ADDITIONAL EXPERIENCE

Program Coordinator — BSEMC · CIIT College of Arts and Technology

Quezon City | March 2022 – May 2023

- Led curriculum improvements by aligning program direction with industry needs and partner feedback.
- Coordinated academic instructors across multimedia, game development, and technology courses to raise delivery quality.
- Supported the adoption of VR/AR technologies within program planning initiatives.

Education Technology Coach · CIIT College of Arts and Technology

Quezon City | October 2020 – May 2023

- Implemented EdTech tools and learning platforms for instructors and students, including full support for remote and hybrid learning during COVID-19.
- Designed and delivered training programmes that enabled effective adoption of available learning technologies.
- Evaluated technology usage across the organisation and recommended evidence-based improvements.

College Instructor — BSEMC & BSCS · CIIT College of Arts and Technology

Quezon City | August 2015 – October 2020

- Taught game development and programming courses aligned with industry standards and student learning outcomes.
- Developed curriculum per CHED guidelines and coached students in on-site and online game and app development projects.

Earlier Roles

- Game Developer / Web Developer — TechFactors Incorporated (March 2017 – August 2018)
- Game Programmer / Game Designer — Lightbreak Studios (June 2017 – December 2017)
- Game Developer / Game Programmer — Zeenoh Games (October 2013 – March 2015)
- Part-Time Instructor, Game Development & Programming — Informatics Computer Institute (June 2012 – September 2013)

EDUCATION

Advanced Diploma in Gaming and Animation Technology · Informatics Computer Institute

Valenzuela | 2012

PROFESSIONAL DEVELOPMENT

Agile Engineering and Object-Oriented Programming Best Practices · Orange and Bronze Inc., October 2019

CompTIA Security+ · In progress — studying via TryHackMe
