Full Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer experienced in building healthcare web applications, REST and GraphQL APIs, authentication, role-based access, audit logs, and production-ready React/Node.js systems. Hands-on with JavaScript, TypeScript, React, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS, shadcn Google Cloud Platform, Supabase, and Vercel.

TECHNICAL SKILLS

Frontend: React, Vite, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn

Backend: Node.js, Express.js, REST API design, GraphQL

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Cloud and Deployment: Google Cloud Platform, Vercel, CI/CD, Docker basics, Linux server management

Tools: Git, GitLab, Jira, Confluence, VS Code, AI-assisted development tools (Codex, Cursor, GitHub Copilot)

Security and Healthcare: Secure authentication, role-based access control, audit logs, HIPAA-aware development, PHI handling, security fundamentals

Additional: Unity3D, Agile/Scrum, UI/UX collaboration, code review

PROFESSIONAL EXPERIENCE

Full Stack Application Developer | Theoria Medical PLLC | Makati City | May 2023 - May 2026

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js for a medical charting system used by 1,000+ providers.
- Built and integrated 10+ APIs supporting insurance processing, charting workflows, user roles, authentication, and patient data operations.
- Developed an automated insurance processing job using pVerify and facesheet data from the Data Science team to finalize patient insurance information for payment workflows.
- Built charting features including screening forms for depression, tobacco use, and SDOH, plus reports for missing patient insurance information.
- Worked on healthcare application features involving HIPAA-aware development practices, role-based access, audit logs, PHI handling, and secure authentication, including PointClickCare authentication.
- Reduced database query volume by 50% for patient and partner portal workflows through backend optimization.
- Fixed 50+ bugs and supported application performance, reliability, and production stability across healthcare workflows.
- Delivered 2-3 tickets from development through production release within 2-week sprint cycles.
- Managed GitLab repositories through merge requests, code reviews, and support for CI/CD deployment processes.
- Collaborated with cross-functional teams through Jira and Confluence to deliver sprint work and improve documentation clarity.

PROJECTS

Maimai Queue Check | React-Vite, Supabase, Vercel | <https://mpqcheckph.vercel.app> | <https://github.com/sensennysen/maimai-queue-check>

- Built and deployed a social-media style queue checking application for a local arcade game community with 100+ users.
- Implemented Google authentication, posts, comments, notifications, admin tools, audit logs, and queue visibility features.
- Maintained an up-to-date song library aligned with the current version of maimai DX.

Ledger | React-Vite, Tailwind CSS, Supabase, Vercel | <https://ledger-personal.vercel.app> | https://github.com/sensennysen/personal_wallet_app

- Built a personal finance application with Google authentication, expense tracking, charts, categories, database persistence, and reports.
- Added credit card management, finance forecasting, budget setting, and reminder features to support personal money management.

ADDITIONAL EXPERIENCE

Program Coordinator - BSEMC | CIIT College of Arts and Technology | Quezon City | March 2022 - May 2023

- Led program improvements by aligning curriculum direction with industry needs and partner feedback.
- Coordinated academic instructors to improve delivery quality across multimedia, game development, and technology courses.
- Supported adoption of emerging technologies, including virtual reality and augmented reality, within program planning.

Education Technology Coach | CIIT College of Arts and Technology | Quezon City | October 2020 - May 2023

- Implemented education technology tools for instructors and students, including support for remote and hybrid learning during the COVID-19 period.
- Created and delivered training programs that helped instructors and students adopt available learning technologies.
- Evaluated technology usage across the organization and recommended improvements based on effectiveness and user needs.

College Instructor - BSEMC and BSCS | CIIT College of Arts and Technology | Quezon City | August 2015 - October 2020

- Taught game development and programming courses aligned with current industry standards, technology trends, and student needs.
- Developed curriculum in accordance with CHED guidelines and coached students in on-site and online game and app development projects.

Earlier Roles

- Game Developer / Web Developer, TechFactors Incorporated | March 2017 - August 2018
- Game Programmer / Game Designer, Lightbreak Studios | June 2017 - December 2017
- Game Developer / Game Programmer, Zeenoh Games | October 2013 - March 2015
- Part-Time Instructor - Game Development and Programming, Informatics Computer Institute | June 2012 - September 2013

EDUCATION

Advanced Diploma in Gaming and Animation Technology | Informatics Computer Institute | Valenzuela | 2012

TRAINING, SPEAKING, AND PROFESSIONAL DEVELOPMENT

Agile Engineering and Object-Oriented Programming Best Practices | Orange and Bronze Inc. | October 2019
